

Invites You To...

**“Intermediate Logic Modeling:
Beyond the good, the bad & the ugly”**
A Technical Assistance Workshop

Friday, June 17th, 2005
Noon to 1:30 p.m.

Multnomah Building
501 SE Hawthorne Blvd, Room 380

Evaluators frequently view logic models as a “necessary evil” required during the program definition step of evaluation. Oftentimes, the logic model product overtakes the logic modeling process. This interactive, practice-oriented workshop will offer participants with some logic modeling experience an opportunity to reexamine logic modeling as both a product and a process. Workshop attendees will gain practical tools & techniques for logic modeling, critique existing models, and understand how program definition acts as a foundation for program evaluation activities. *Contact Kari Greene for more information, kari.greene@state.or.us*

Free & Open to the General Public
No registration required

Light refreshments are provided but feel free to bring a lunch.
